Where Winegrower and Painter meet

Who dares to move in the footsteps of famous painters in the midst of a unique vineyards landscape, to get involved in a play of light and colours, to approach what cannot be grasped, will at the same time always look into the mystery, that vines hold in their profundity. Maybe that wine, as paintings, is just an approach to what is beyond words.

It's therefore almost obvious that winegrower and painter meet one another, exchange, reflect and create something together. The project ART – WINE resulted from such an encounter: Three bottles of excellent wine of the Lavaux combined with an original painting from the same region form an incomparable souvenir.

We offer this proposal, suited as a very personal gift as well, for CHF 350 a carton:
